Assembly tips

Tips of assembling

1. Before the process of assembling, it is always a well-known
2. Do not glue the parts that can be moved after assembling. That needs self-preservation.
3. Do not stick your glue into the dollar corner (eye) repeatedly, considering its vital work.
4. Do not throw away the redundant parts.
5. Please keep the instruction manual properly.

Part number illustration

Refer to the part number and the figure, and compare it with the pieces attached. Then separate it after confirmation, sorting the necessary pieces out.

Part list illustration

1. All parts are in the figure of part list before assembling to ensure
2. Check the part number in the part number on the part list and
3. Find the part number in the part list and separate it from the sprue.
