

ROBOTIME

Beginner Checklist

Start Your First Build with Confidence

QUICK START (30 SECONDS)

- Check that all parts are included
- Prepare your basic tools
- Follow the instructions step by step

1. WHAT'S IN YOUR KIT

- Wooden laser-cut boards or plastic parts
- Illustrated instruction manual
- Accessories (fabric, LED lights, metal parts, etc.)
- Sandpaper (included for smoothing edges)

 **Tip:** If anything is missing, please contact our support team before starting your build.

2. RECOMMENDED TOOLS

✓ Essential Tools

- Tweezers (for handling small parts)
- Scissors or a craft knife
- Toothpicks (for precise glue application)

✨ Optional Upgrades

- Wood glue (for stronger bonding)
- Small paintbrush (for color and details)
- Rubber bands or clips (to hold parts)
- Dust cover (for display protection)

3. SET UP YOUR WORKSPACE

- Work on a well-lit table
- Use a mat or old newspaper to protect your surface
- Prepare small trays or dishes to sort parts
- Keep your phone or tablet nearby for tutorials
- Set aside 2-4 hours of uninterrupted time

 **Safety Tip:** Handle sharp tools carefully and keep them out of reach of children.

4. BEFORE YOU BUILD

- Read through the full instruction manual once
- Check all parts against the manual
- Do a “dry fit” first (test assembly without glue)
- Pay attention to part direction before removing
- Remove parts step by step – avoid taking all out

5. WHILE YOU BUILD

- Follow the instructions in order (don't skip ahead)
 - Apply glue in small amounts, gradually
 - Let the glue become slightly tacky before pressing
 - Check each completed section against the manual
- 💬 Don't worry about mistakes: Most parts can be gently adjusted or reassembled if needed.

6. FINISHING TOUCHES

- Check all joints are secure
- Reinforce any loose parts with extra glue
- Lightly sand any rough edges
- Add paint or decorative details (optional)
- Choose a dry, shaded place for display
