Assembly tips

Cut small parts from the tray & remove the residue.

Remove the parts by pressing forward or backward.

Polish the sharp cuts with sand paper & clean the dust.

Tips of assembling

1. When it comes to glue, a little is enough.
2. Glue the parts gently & press them softly. Glue needs half evaporation.
3. Do not stick glue when the double-sided tape is exposed, controlling its mess work.
4. Do not glue the moving parts unless instructed.
5. Glue the parts in a clean & dry environment.

Part number illustration

Refer to the part number square, find the piece, and compare it with the picture below. Then operation is after confirmation. (Only for textured version of figure)

Part list illustration

1. Each part is numbered and labeled list before assembling to ensure a smooth building process.
2. Carefully check the number of parts in the package and compare them one by one with the illustration to ensure it is right before assembling.

Tools required (The sign of the screw "+" corresponds to the screwdriver.)

Sandpaper

Double-sided tape

Tweezers

Screwdriver (Cross-head)

Screws
