Assembly Tips

01 Notice

WARNING:

- Not suitable for children under 3 years old.
- Small parts present. Keep out of reach of children. Risk of choking if ingested. Contains magnets.
- Sharp edges and points. Handle with care. Risk of injury.
- Do not ingest. Risk of chemical burns. Keep away from children.
- To prevent injuries, use with adult supervision. Keep away from fire. Do not short-circuit the storage battery. Do not charge non-rechargeable batteries. Do not mix different types of batteries. Do not mix old and new batteries. Insert batteries with correct polarity. Remove exhausted batteries from the toy. Remove batteries if the toy is not used for a long time. Do not charge batteries unless they are intended to be charged. Charge rechargeable batteries only under adult supervision.
- Do not swallow batteries. Chemical burns hazard. Keep new and used batteries away from children. Batteries may explode or leak and cause injuries to your hands or other parts of your body. Do not dispose of batteries in fire.
- Do not swallow cells. Chemical burns hazard. Keep new and used batteries away from children.

- Do not use this product near heat.
- Do not use this product near open flames.
- Do not use this product near sparks.
- Do not use this product near heat sources.
- Do not use this product near electrical sources.
- Do not use this product near chemicals.
- Do not use this product near flammable materials.
- Do not use this product near explosive materials.
- Do not use this product near corrosive materials.
- Do not use this product near toxic materials.
- Do not use this product near radioactive materials.
- Do not use this product near biological materials.
- Do not use this product near infectious materials.
- Do not use this product near contaminated materials.
- Do not use this product near hazardous materials.
- Do not use this product near dangerous materials.
- Do not use this product near unsafe materials.
- Do not use this product near defective materials.
- Do not use this product near damaged materials.
- Do not use this product near worn materials.
- Do not use this product near broken materials.
- Do not use this product near cracked materials.
- Do not use this product near chipped materials.
- Do not use this product near scratched materials.
- Do not use this product near dented materials.
- Do not use this product near bent materials.
- Do not use this product near twisted materials.
- Do not use this product near deformed materials.
- Do not use this product near warped materials.
- Do not use this product near faded materials.
- Do not use this product near discolored materials.
- Do not use this product near stained materials.
- Do not use this product near soiled materials.
- Do not use this product near dirty materials.
- Do not use this product near wet materials.
- Do not use this product near damp materials.
- Do not use this product near moist materials.
- Do not use this product near humid materials.
- Do not use this product near steamy materials.
- Do not use this product near foggy materials.
- Do not use this product near misty materials.
- Do not use this product near cloudy materials.
- Do not use this product near hazy materials.
- Do not use this product near smoky materials.
- Do not use this product near dusty materials.
- Do not use this product near sandy materials.
- Do not use this product near gritty materials.
- Do not use this product near rough materials.
- Do not use this product near smooth materials.
- Do not use this product near polished materials.
- Do not use this product near glossy materials.
- Do not use this product near matte materials.
- Do not use this product near textured materials.
- Do not use this product near patterned materials.
- Do not use this product near colored materials.
- Do not use this product near transparent materials.
- Do not use this product near translucent materials.
- Do not use this product near opaque materials.
- Do not use this product near reflective materials.
- Do not use this product near non-reflective materials.
- Do not use this product near conductive materials.
- Do not use this product near non-conductive materials.
- Do not use this product near magnetic materials.
- Do not use this product near non-magnetic materials.
- Do not use this product near flammable materials.
- Do not use this product near non-flammable materials.
- Do not use this product near explosive materials.
- Do not use this product near non-explosive materials.
- Do not use this product near toxic materials.
- Do not use this product near non-toxic materials.
- Do not use this product near radioactive materials.
- Do not use this product near non-radioactive materials.
- Do not use this product near biological materials.
- Do not use this product near non-biological materials.
- Do not use this product near infectious materials.
- Do not use this product near non-infectious materials.
- Do not use this product near contaminated materials.
- Do not use this product near non-contaminated materials.
- Do not use this product near hazardous materials.
- Do not use this product near non-hazardous materials.
- Do not use this product near dangerous materials.
- Do not use this product near non-dangerous materials.
- Do not use this product near unsafe materials.
- Do not use this product near safe materials.
- Do not use this product near defective materials.
- Do not use this product near non-defective materials.
- Do not use this product near damaged materials.
- Do not use this product near undamaged materials.
- Do not use this product near worn materials.
- Do not use this product near unworn materials.
- Do not use this product near broken materials.
- Do not use this product near unbroken materials.
- Do not use this product near cracked materials.
- Do not use this product near uncracked materials.
- Do not use this product near chipped materials.
- Do not use this product near unchipped materials.
- Do not use this product near scratched materials.
- Do not use this product near unscratched materials.
- Do not use this product near dented materials.
- Do not use this product near undented materials.
- Do not use this product near bent materials.
- Do not use this product near unbent materials.
- Do not use this product near twisted materials.
- Do not use this product near untwisted materials.
- Do not use this product near deformed materials.
- Do not use this product near undeformed materials.
- Do not use this product near warped materials.
- Do not use this product near unwarped materials.
- Do not use this product near faded materials.
- Do not use this product near undyed materials.
- Do not use this product near discolored materials.
- Do not use this product near undiscolored materials.
- Do not use this product near stained materials.
- Do not use this product near unstained materials.
- Do not use this product near soiled materials.
- Do not use this product near clean materials.
- Do not use this product near dirty materials.
- Do not use this product near wet materials.
- Do not use this product near dry materials.
- Do not use this product near damp materials.
- Do not use this product near moist materials.
- Do not use this product near humid materials.
- Do not use this product near steamy materials.
- Do not use this product near foggy materials.
- Do not use this product near misty materials.
- Do not use this product near cloudy materials.
- Do not use this product near hazy materials.
- Do not use this product near smoky materials.
- Do not use this product near dusty materials.
- Do not use this product near sandy materials.
- Do not use this product near gritty materials.
- Do not use this product near rough materials.
- Do not use this product near smooth materials.
- Do not use this product near polished materials.
- Do not use this product near glossy materials.
- Do not use this product near matte materials.
- Do not use this product near textured materials.
- Do not use this product near patterned materials.
- Do not use this product near colored materials.
- Do not use this product near transparent materials.
